KAMIL ZWOIŃSKI

Computer Science student — University of Gdańsk

github github.com/szfkamil
linkedin linkedin.com/in/kamil-zwoiński
email professional@kamilzwoinski.com

SUMMARY

Computer science student with a 4.94 GPA and solid Java fundamentals. Comfortable working in Linux, Git, and shell as a default development environment; building projects in C, Java, and Assembly while looking for a software engineering internship.

EDUCATION

University of Gdańsk — Computer Science, BSc (licencjat) Oct 2025 – expected 2028
Faculty of Mathematics, Physics and Informatics

- 4.94 GPA — highest grade in every completed course (grading scale 2–5)
- Completed: Intro to Programming, Discrete Mathematics I–II, Databases, Programming Languages (Python), Mathematical Analysis, Linear Algebra, Web Technologies, Programmer's Workshop

PROJECTS

db-academic-library — *relational database system, PostgreSQL* 2025–present

- Designed a 26-entity relational schema for academic library cataloging and loans
- Implemented stored procedures, triggers, views, functions and an ERD model
- Modeled on professional standards (FRBR, MARC21); enforces per-user-type loan policies
- Tech: PostgreSQL, SQL, database design, ER modeling

programming-languages — *Python coursework* 2025–present

- Chess engine — OOP design with unit tests
- World simulation — inheritance hierarchy (animals/plants), event-driven logic
- Invoice/shop system — full test-double suite (mock, stub, fake, spy, dummy), 15 unit tests
- Tech: Python, OOP, unit testing

ergonomic keyboards — *QMK firmware & hardware* 2024–present

- Maintain custom forks of QMK firmware (C) implementing my own changes for ergonomic 40% split keyboards
- Co-authored the community build guide for the ultra-compact split ergonomic Dilemma v3: Dilemma_v3_Procyon
- Documented hardware customization, soldering procedures, and precise spatial specifications for seamless assembly
- Assemble and troubleshoot custom builds: PCB/electronics sourcing, hand soldering, hardware debugging in KiCad
- Tech: C, QMK, KiCad, electronics

szfkamil.github.io — *personal website* 2023–present

- Static personal site, hand-written HTML and SCSS
- Responsive landing page with a terminal-inspired visual identity
- Tech: HTML, SCSS

TECHNICAL SKILLS

Programming:
Java (OOP), Python, C (QMK firmware), C++, JavaScript (vanilla), SQL/PostgreSQL, HTML/SCSS, Bash and Zsh scripting

Tools & workflow:
Linux (daily power user), git, shell, Doom Emacs (Evil)

Hardware:
KiCad, electronics, soldering, hardware debugging

Currently learning:
Assembly, data structures & algorithms

LANGUAGES

- Polish — native speaker
- English — C1 (CEFR)
